Flush Mount Soffit

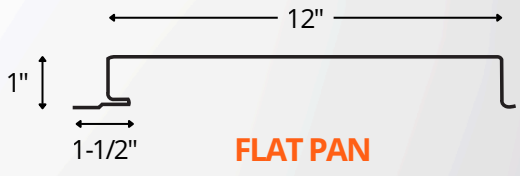

Flush Mount Soffit Panel features a sleek, low-profile design with concealed fasteners and 12″ coverage for a smooth, modern appearance. The 1″ panel depth makes it an ideal choice for soffit, fascia, and siding applications. Available in solid or vented options with subtle pencil ribs, this versatile panel can be installed vertically or horizontally. Offered in a wide selection of 24-gauge colors, including realistic woodgrain finishes, it delivers both performance and design flexibility.

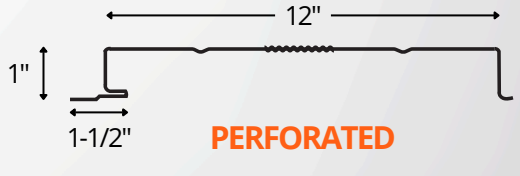

FLUSHMOUNT SOFFIT DETAILS

- ☑ **Concealed and direct fastened for wall, soffit, fascia or linear applications**
- ☑ **12" Panel coverage**
- ☑ **Applies over open framing or solid substrate**
- ☑ **Available in 24 Guage**

Offset Soffit

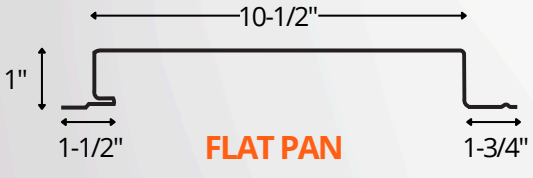

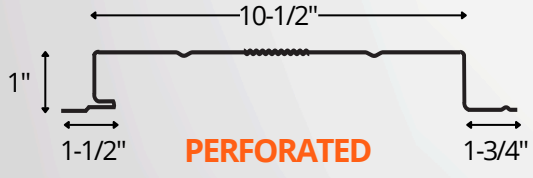

Offset Soffit & Wall Panel adds distinctive character and architectural depth to any project. Designed with a 1-1/2″ reveal, this profile creates striking shadow lines that enhance the visual dimension of your building. Mix profiles and seam depths to achieve a custom, modern aesthetic. Ideal for walls, soffits, and fascia, Offset Soffit is available in solid or vented options. The panel can be installed vertically or horizontally and is offered in a wide range of 24-gauge colors, including rich woodgrain finishes, giving you the flexibility to bring your design vision to life.
